Computer Science major in Data Science at the University of Santo Tomas – Manila, passionate about leadership, growth, AI, technology, and innovation. I thrive on turning my creative ideas into actionable projects, inspiring others by leading with vision and purpose. Beyond technology, I am committed to personal development through volunteering, hackathons, projects, and internships to fulfill my potential.

EDUCATION

University of Santo Tomas – Manila

[2022 – Present]

Bachelor of Science in Computer Science, Specializing in Data Science

- 4th Year Level Representative of Computer Science Department (AY 2025-2026)
- Dean's Lister (AY 2025)
- Class secretary (AY 2022-2024)

Polytechnic University of the Philippines

[2020 – 2022]

Senior High School, STEM Strand

- Graduated with High Honors
- Business Manager (1st and 2nd term of AY 2021-2022)

Rizal Technological University

[2016 – 2020]

Laboratory High School

- Grade 10 Representative (AY 2019-2020)
- With Honors (AY 2017-2020)

FORMAL WORK EXPERIENCE

Jollibee Group - Quinta Market Branch

September 2024 - June 2025

Frontend Developer

- Collaborated with a team to **develop a full-scale HR and payroll system**, currently deployed and actively in use. Has features for payroll generation, employee information management, and Admin tools.
- Designed **wireframes, prototypes, and front-end functionality** aligned with **Jollibee's branding** for a cohesive and user-friendly interface.
- Implemented an NFC-based attendance tracking system, automatically recording employee time logs into a central database.
- Applied software engineering principles, including requirements gathering, design documentation, implementation, testing, and deployment.
- Communicated clearly with the client to gather feedback and align with business requirements, while contributing to system design by **suggesting and initiating new features** for improved usability and efficiency.
- Delivered a production-grade solution meeting real business needs, showcasing teamwork and end-to-end system development.

White Medience, Philippines

Short-term, February 2025

Marketing And Event Intern

- Assisted in registration for 250+ attendees, including walk-ins, ensuring smooth guest experience and securing almost 100% attendance.
- Created event props, visuals, and marketing materials to support product promotion.
- Supported the events team and coordinator in delivering a seamless program.
- **Recognized by the founder**, a Korean entrepreneur, for adaptability, hard work, and commitment to meeting deadlines.

PROJECTS

Instance-Aware MambaBDA: Addressing Clumping in Remote Sensing Imagery

January 2025 - Present

Python Deep Learning, Computer Vision, Geospatial Analysis

- Proposed a novel solution to a problem not addressed in existing literature, extending the ChangeMamba architecture to achieve precise separation of individual building instances in remote sensing imagery.
- Applying advanced computer vision techniques, dataset preparation, and model optimization to address clumping issues and improve building damage classification accuracy for real-world geospatial scenarios.
- Implementing the model with a focus on instance segmentation, consistency regularization, and deep learning optimization for urban mapping applications.
- Thoroughly documented research and design, serving as a strong foundation for the thesis.

Globe Gokenzone – Social & Gamified Engagement Platform

August 2025

Globe Model Community Award Winner | React, Typescript, Tailwind CSS

- Pitched and developed a working prototype of our Gokenzone version for Globe Innovania 2025, winning the Globe Model Community Award.
- Designed and implemented social and gamified features to increase user engagement, including public profiles, friend lists, avatar customization, and peer-driven challenges.
- Built a progress tracking system with friend streaks, badges, and leveling mechanics to encourage daily interaction and reward achievement.
- Integrated real-world impact features via Goken-for-a-Cause donations, bridging online fun with meaningful initiatives.
- Explored Geo-Based Augmented Reality Hunts for normal, themed, brand-partnered, and campus tour events, enhancing immersive experiences and reward discovery.
- Award-winning project on Globe pitched and developed as a working prototype, winning the Globe Model Community Award and Globe Content Creation Challenge.

BPI Sparks Academy – Datawave 2025 Hackathon Entry

August 2025

Web & AI-Enhanced Employee Growth Platform | React, TypeScript, Supabase, Tailwind CSS

- Led the design and development of an AI-driven employee growth ecosystem to reduce attrition, improve efficiency, and enhance skill development across BPI.
- Built interactive front-end dashboards and adaptive learning interfaces using React, TypeScript, Tailwind CSS, and shadcn/ui.
- Implemented AI support bot using Gemini Pro API with Retrieval-Augmented Generation (RAG) architecture to provide instant operational support and personalized learning recommendations.
- Developed backend infrastructure with Supabase and Postgres for secure management of user profiles, assessments, and anonymized team data.
- Conducted user-centered design and iterative prototyping in Figma, validated workflows, and created synthetic datasets for performance testing.

Memory Lane – Digital Scrapbook Mobile App

December 2024

Cross-Platform Mobile Development | Flutter & Firebase

- Developed a Flutter-based mobile application enabling users to capture or upload photos, customize pages, and create personalized digital scrapbooks.
- Implemented core features: interactive page navigation, basic image editing, and scrapbook compilation.
- Applied modern UI/UX design principles to ensure a smooth and engaging user experience.
- Designed the branding, logo, and animations, establishing a cohesive visual identity for the app.
- Integrated Firebase as cloud backend for real-time data storage and scalability.

Tutor Management System for ActiveLearningPH

April 2024

Web & Data Management Application | Java, MySQL, JavaScript

- Developed a web application to streamline tutor application, hiring, and applicant progress tracking for ActiveLearningPH.
- Led project team, overseeing UI/UX design, and front-end development with HTML, CSS, and JavaScript for a user-friendly experience.
- Implemented server-side logic with Java EE on GlassFish to manage requests and sessions efficiently.
- Designed features for user registration, application tracking, administrative review, and report generation with downloadable PDFs.
- Utilized Java DB (Apache Derby) and MySQL for secure and efficient data management.
- Applied encryption, secure user authentication, and error handling to safeguard sensitive information.

TrendHub – Outfit Sharing Social Media

December 2023

Web Application | JavaScript, HTML, CSS, Figma

- Designed and developed a social media-style web prototype for users to share and browse outfit inspirations, inspired by Pinterest but outfit-focused.
- Focused on emphasizing layout, typography, basic functionality using JavaScript, and responsive design using HTML and CSS.
- Created interactive mockups and implemented a clean, user-friendly interface to showcase design thinking and usability.

TomasiKnows – AI Study Learning Prototype

December 2022

AI-Powered Note Conversion & Study Tool | Figma Prototype & Concept

- Conceptualized and documented a study-focused AI tool that converts physical notes into digital formats such as flashcards or Feynman technique guides.
- Designed prototype workflows and user experience, exploring adaptive study formats to enhance learning efficiency.
- Applied research in AI-assisted learning, note digitization, and personalized study methods, creating a foundation for future development.

EXPERIENCE & LEADERSHIP

Amazon Web Services (AWS) Learning Club - UST

Chief Finance Officer | June 2025 - Present

- Project Head of the General Assembly of AWS - UST staff.
- Manage and encode cash flows.

Co-founder and Chief of Design | August 2024 - June 2025

- Co-founded the organization as the first cloud technology-driven organization for the students of the University of Santo Tomas.
- Strategized and executed comprehensive plans for upcoming organizational events.
- Developed and maintained the club's visual identity, enhancing brand recognition and member engagement.
- Led the design of educational materials and event visuals, ensuring alignment with the club's goals.
- Collaborated with the co-founder team to integrate design into club initiatives and events.

UST Computer Science Society

4th Year Level Representative | June 2025 - Present

- Effectively communicated announcements and updates to the batch, ensuring high engagement and awareness.
- Coordinated with block representatives to organize initiatives and address student concerns.
- Committee Head of External Affairs & Finance
 - Conducted establishment hopping, designed flyers and primers, and negotiated with companies to maximize collaboration, partnership, and sponsorship effectiveness.

- Proposed and developed a marketing video for Globe, boosting online reach by 1.5x and winning the Globe Content Creation Award.
- Managed committee operations, delegated tasks, tracked finances, and ensured cost-efficient execution of events.
- Co-Project Head of Staff & Member Recruitment and Staff Orientation
 - Help enhance applicant engagement through UI improvements and implementation of the “Which Committee Are You?” personality test feature on the ongoing development of CSSApply website.
 - Coordinated staff orientation (General Assembly), creating forms, setting goals, and organizing activities.

Executive Associate of 3rd Year Level Representative | September 2024 - June 2025

- Disseminate announcements to whole 3rd year computer science students.
- Process documentation and paperworks for every event of the Computer Science Society.
- Volunteer Logistics on CS Night 2024 assisted with logistics, ensuring smooth event operations
- Volunteer Photographer on Vuja De Tech Talks captured event highlights, supported media documentation, and edited photos.

UST CISCO Networking Academy Gateway - CICS

Vice President for Audit and Logistics (Head) | June 2024 – June 2025

- Trained department staff and directors to ensure best practices and smooth operations.
- Optimized procurement and budget, sourcing high-quality materials like ID laces and membership cards, saving ~₱4,500 while maintaining quality.
- Negotiated supplier deals, securing discounts and favorable terms to reduce event costs.
- Managed financial auditing processes, cash flows, maintaining accurate financial records.
- Assisted with organization booths, webinars, and event setups, ensuring seamless operations.
- Co-led project management for review sessions on CISCO technologies, providing detailed plans and coordinating schedules for successful execution.
- Head of logistics for UST CNAG Cisco Competition, ensuring smooth event operations from setup to teardown.

Documentation Evaluation Committee Director | June 2023 – June 2024

- Handled and screened organizational documents, including pre- and post-event reports.
- Processed official organizational papers for activities and projects, ensuring accuracy and compliance.

Graphics and Design Committee | September 2022 – June 2023

- Created promotional designs and materials for organizational events and online platforms.
- Assisted in event facilitation, including booth setups and logistics support.

TOMCAT – UST

Operations Division – Technical Operation Department Staff | October 2022 – Jun 2025

- Filmed and documented key moments during events and behind the scenes to capture highlights for promotional and archival purposes.
- Collaborated with event organizers, participants, and volunteers to understand objectives and deliver visually compelling results.
- Utilized various videography equipment to produce polished final video products.
- Talent Coordinator & Production Assistant for Mulat 2025 (April 3-4, 2025)
- Served as Assistant Stage Manager for Thomasian Welcome Walk 2024 (August 6, 2024).
- Morning shift videographer for CATs campaign (March 19, 2024).
- Videographer for Athletes General Assembly 2024 (February 17, 2024).
- Videographer for TAA: University Expo 2023 (September 27–29, 2023).

ICS Student Council

Creatives Staff | September 2023 – June 2024

- Created visually compelling public materials using Adobe Photoshop and Canva to engage the audience.
- Conceptualized, and organized the department’s booth, including layout and aesthetics.
- Volunteered to assist and interact with booth visitors, ensuring a positive and engaging booth experience.

CONFERENCES

- UX+ Conference 2024 (UX+, August 18, 2024)
- TechBayanihan 2024: Copilot Para Sa Bayan (TechBayanihan, August 2–3, 2024)
- Block Dojo Philippines Cohort 2 (BlockDojo, August 1, 2024)

WORKSHOPS, SEMINARS & BOOTCAMP

Data Science, AI & Analytics

- BPI DATA Wave 2025 Learning Sprint: Human-Centered Market Research & Ideation; Solution Blueprint & AI Architecture (Eskwelabs, July 11 & 30, 2025)
- Data Science Workshop: Professor Widom's Instructional Odyssey (DLSU, September 2024)
- Education 4.0: Generative AI and the Future of Learning (Gen AI Philippines, July 19, 2024)
- Business Intelligence with Power BI: End-to-End Solution (DataSense Analytics, July 18, 2024)

Cloud & Infrastructure

- Stratpoint's AWS Cloud Series Workshop (Stratpoint, June 25, 2024)
- Next Generation Infrastructure using CompTIA Cloud (Mapúa University, July 21, 2023)

Cybersecurity & Blockchain

- Smart Contracts 101: Coding for the Blockchain Workshop (Xaltius Academy, June 30, 2024)
- Social Engineering Defense: Protecting Against Human-Driven Threat (Xaltius Academy, March 31, 2024)
- Cybersecurity Awareness Seminar – Trends Group and CyberQ Group (UST CICS, October 8, 2022)

Web & Development

- Web Design (Connecting Allies Digital Co-Creators, July 2023)
- CICS Fundamentals – GitHub Workshop (UST Computer Science Society, May 3, 2023)
- CICS Fundamentals – JavaScript Workshop (UST Computer Science Society, May 2, 2023)

Career & Leadership

- Think Fast, Think Smart: AI as Your Career Wingman (Makesense Asia, 2025)
- Vuja De Tech Talks 2024 (UST CICS-CSS, February 27, 2024)

COMPETITIONS & HACKATHONS

Globe: Innovania 2025 – *Globe Model Community Award & Globe Loop's Content Creation Award*

PUP The Programmer's Guild: Coding Challenge – *1st Runner Up*

UST CNAGaling 2024: CISCO – *Participation Award*

SKILLS & INTERESTS

Computer Skills: HTML/CSS, JavaScript, Typescript, Java, Python, RStudio, Tableau, Flutter, PHP, SQLite, MySQL, PostgreSQL, Git, GitHub, Microsoft Office, Notion, LaTeX, Canva, Figma

Interpersonal Skills: Empathy, Innovation, Creativity, Problem-Solving, Time Management, Teamwork, Communication, Pitching, Leadership, Adaptability, Consistency, Hardworking

Languages: English, Tagalog

Interests: Ideathons, Research, Machine Learning, Artificial Intelligence, Data Analysis, Data Scraping, Web Development, Mobile Development, Content Creation, Video Editing, Visual Materials
